## SORRY WE MISSED YOU!

**ITG Communications**, in partnership with **Beeline Engineering LLC**, will be conducting field surveys in your neighborhood on behalf of **Intrepid Fiber Networks**. Access to your backyard is required to collect information on existing utility poles.

Because we were unable to reach you, please call:
**(629) 308 – 1652**
so that we may complete our survey.

We will attempt to revisit on:
_____ at _____ AM/PM

# SORRY WE MISSED YOU!

**What you need to know about field surveys:**

- The only information collected during this process is the location of existing utilities within streets, sidewalks, or city owned utility easements in your backyard.
- A survey that requires access to your backyard will generally take 5 minutes or less and involves taking a few photos of the condition of the pole. A measuring stick is also used to capture the height of the existing cables from the ground level.
- This information allows for the design and permitting of a safe and reliable high-speed internet service.
- Any of our representatives that contact you acts on official business of a utility provider and WILL NOT at any point collect data that is personal or sensitive in nature.
